Quiz No. 1 (CLO - 1)

10 marks

Quiz 1: Basic Flutter UI Widgets

Task

Create a simple Flutter screen to **demonstrate your understanding of basic Flutter UI widgets**. Use the required widgets given below and arrange them vertically using a **Column**. Use **Center** to align the complete content in the center of the screen.

The purpose of this task is to understand **which widget is used for which type of input, how to define, selection, and display**. No proper UI design or advanced styling is required.

Required Widgets

1. **Text** – Display a heading such as "Student Registration Form".
2. **TextField** – Enter Student Name.
3. **TextField** – Enter Registration Number.
4. **Radio Button** – Select Gender (Male/Female).
5. **Checkbox** – Select Hobbies (Reading/Sports).
6. **Option List** – Display 2–3 options.
7. **Selection List** – Display 2–3 selectable items.
8. **Dropdown List** – Select Department (CS/IT/SE/AI).
9. **Button** – Add a simple button.
10. **Submit Button** – Add a Submit button.

Instructions

- Use only basic Flutter widgets.
- No proper UI design or decoration is required.
- No images, cards, or advanced styling are required.
- All widgets must be **center aligned**.
- Arrange the widgets vertically using a **Column**.
- The application must run successfully.

Submission Requirements

- Submission on **GitHub is required**.
- Upload your work in the **Quiz 1 folder** of the required GitHub repository that has already been shared.
- Upload the following files/folders to GitHub:
    - **lib folder**
    - **pubspec.yaml**
    - **Minimum 2 screenshots** showing the output screen of your application.
